

## ATV / UTV, CADET TRAILER

UTV400  
6m SB  
Boom  
5911684

**Heavy duty tandem axle ATV / UTV sprayer** with 400 litre tank and high flotation tyres offers serious capacity for small farming operations.

An excellent alternative to small three point linkage sprayers, where capacity is required but towing is preferred.

A standard 50mm trailer coupling provides easy connection to utility vehicles and the draw bar includes a smooth ride shock absorber to allow for independent movement between the trailer and the vehicle.

With a choice of 6 or 8 metre boom for the 400 litre UTV trailer, this sprayer can cover the ground fast and efficiently. Great for spot spraying with 6 metres of hose and a 60S spray gun.

Features:

- Flo-jet pump and fuse protected loom
- 6 metres delivery hose
- HARDI 60S spray gun
- Fitted with drain and filter basket
- External suction filter
- Heavy duty powdercoated frame
- Flotation tyres
- Terrain following drawbar
