

Remarkable performance

Simple and easy to use

ZEBRA

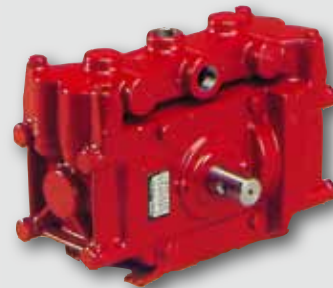

Simple to operate and with low maintenance costs

The ZEBRA is a versatile and easy-to-use mist-blower. It adapts perfectly to fields with narrow rows and crops grown on terraces. The ZEBRA is a machine specially made for farms with no heavy workload.

The axial fans are available in three different models: EF650, EF750 and EF820. All blowers have a disconnection device that allows the agitation to function although the fan wheel has been turned off. The fan housing is made of knockproof polyethylene and incorporates two bottom deflectors that help optimizing the air distribution. The spray lines are fitted with 12 non-drip nozzle holders.

The ZEBRA features a 321/10 diaphragm pump (73 l/min; 25 bar). You can choose between a manual operating unit, M70/2 or a SV/2 operating unit with solenoid valves and remote control box.

The top mounted suction filter makes cleaning quick, safe, and easy for the operator.

Technical specifications

Air kit	EF650	EF750	EF820
Air volume, 1,000 m ³ /h	25	30	35
Power consumption, blower, kW	14	16	22
Diameter, mm	650	750	820
Fan material	synthetic	synthetic	synthetic
Fan housing material	polyethylene	polyethylene	polyethylene
Max working height (m), recommended	3.2	3.4	3.6
Max row width (m), recommended	2.9	3	3.2

Measurements and weights

Tanks, litres	300	400	600	800
Total weight, kg	160	175	190	210
Length, cm	105	105	125	125
Width, cm	100	105	110	145
Height, cm	105	110	150	160
